Chapter	Section	Page	Change
3	3.2	3-2	<ul style="list-style-type: none"> Check the MDS 3.0 Web site regularly for updates at: http://www.cms.gov/NursingHomeQualityInits/2545_NHQIMDS30TrainingMaterials.asp.
3	3-3	3-4 & 3-5	<ul style="list-style-type: none"> When completing the MDS 3.0, there are some items that require a count or measure-ment, however, there are instances where the actual results of the count or measurement are greater than the number of available boxes. For example, number of pressure ulcers, or weight. When the result of a count or measurement is greater than the number of available boxes, facilities are instructed to maximize the count/measurement by placing a "9" in each box (e.g. k0200B if the weight was 1010 lbs you would enter 999 in the available boxes). Even though the number is not exact, the facility should document the correct number in the resident's medical record and ensure that an appropriate plan of care is completed that addresses the additional counts/measurements.
